Expertise of teaching assistant (10=highly satisfied)	0	0	0	0	0	0	0	1	8	14	0	23	9,57	10,00	0,33
Atmosphere in tutorial (10=highly satisfied)	0	0	0	0	0	1	0	1	4	17	0	23	9,57	10,00	0,85
Availability of teaching assistant outside of class (10=highly satisfied)	0	0	0	0	0	0	1	4	2	15	1	23	9,41	10,00	0,95
Overall satisfaction with the teaching assistant (10=highly satisfied)	0	0	0	0	0	0	0	2	6	15	0	23	9,57	10,00	0,42
Overall satisfaction with the tutorial (10=highly satisfied)	0	0	0	0	0	0	2	2	4	15	0	23	9,39	10,00	0,93

Question	Answer
What did you like about the tutorial?	The PPTs and Graphs!
	Adrian was very good in clearing our concepts, sometimes even more so than the main lectures.
	Adrian was available throughout the semester to clear any doubts we may have had. Further, he was always actively present in classes and labs.
	It was very friendly and accommodating.
	Great overall
	Adrian was kind, patient and explained well. I really enjoyed his class.
	The tutorial reinforced concepts discussed in the class. Teaching assistant was very engaging with class and ensured everyone participated.
	Awesome teaching skills by Adrian. Well done. I have been in some other labs too and his was definitely the best.
	Very much appreciated how he went over the main concepts from the lecture, especially the ones where the lecturer did not fully explain the concepts in that much detail. Also the slides from the tutorial were very beneficial as they sometimes provided a step by step guide on how to answer the questions from the homework.
	Also he is very approachable so feel I was able to ask questions/ reach out after class for further clarification.
	Very patient to explain the content
	Teaching style, ability of the TA to deal with ambiguity in the classroom, openness to suggestion
	Adrian did a great job! I sometimes initially didn't understand concepts taught in the lecture, but after the lab I always felt like I got the point of everything.
	Always very thorough and provided clear explanations. Always asked for our feedback.
	Pretty much everything about Adrian's tutorials have been great! I really enjoy the way he teaches and he is always great with answering questions and clearing doubts.
	TA was very responsive to doubts outside the class and TA was also very encouraging and appreciative of our efforts.
	Adrian was a great tutor, he clearly put effort into preparing for the labs and wanted us all to understand the content. He had an approachable and easy going manner and was happy to help whenever anyone needed it. He was also very clear in his descriptions, which made it easy to grasp the content.
	Adrian is very attentive and thorough with his explanations!
	Very engaging
	Tutorial are good, digesting the lecture and providing a good discussion in small group.
	TA was knowledgeable in material.
	Very comprehensive discussions of topics presented in the lectures; Adrian is always well prepared for the lab sessions
	Good discussions, feedback and involvement of students in the class
	Adrian really helped us understand the lectures better
What did you not like about the tutorial?	In the beginning of the Semester alone it would have been better if TAs aligned on answers of assignments because different TAs had different answers.
	A bit too fast at times.
	Feedback on homework answers was more lenient than how answers during midterm were assessed.
	Nothing about Adrian: The room was too small...
	Feedback from the problem sets and not just generic class feedback.
	It could have more applied exercises and discussions, not just problem set resolutions
	Nothing, except sometimes we went overtime.
	TA could have been more interactive and involve all the students and help a little more in clearing concepts.
	Online tutorials are inherently tricky and I would have loved more interaction with different participants in the course but I think Adrian did a good job of facilitating discussion through this medium.
	All good
	TAs are too rigid in grading. There are many problems in Economics that don't have black and white answers. But for several graded requirements (HW and midterms), we were penalized for providing explanations that may be "unconventional" in the sense that it was not worded exactly as it is in the answer key, but ultimately mean the same.
What suggestions do you have to improve the lecture and/or tutorial?	No, Adrian was a fabulous TA.
	The grading system could be improved a bit.
	Ensure feedback provided on homework answers is as strict as exams, ensuring students have a good idea of what to expect during the exam.
	Continue, it was just really great. Thank you very much for your time teaching us.
	Sometimes he went over some concepts a little bit too fast and I would have preferred a more simplistic answer, especially in the beginning as I have never studied economics before.
	Having different case studies to discuss and not only the theory by the book
	I really don't have any. Keep it up!
	A more general problem with labs in general, but I feel like there should be an easier way to get consent from students for recording sessions since I believe everyone would like to rewatch them but just doesn't fill the consent form
	Conduct individual office hours and check on progress of individual students.
	Please figure out a way to record the lab sessions! It is very important for us to look back at the labs and revise.
	all good
	Wish the labs would help out with the exams and problem sets. Felt that even though information and explanations were provided and understood, graded marks were not consistent between labs, students and reflection of what was taught.
	An extra lab hour in the week
